1 What this document will cover

This document is supposed to cover some additional features, shortcuts and plugins that I implemented. This is supposed to document some very important self-made and "vim-made" features that I don't want to forget about. Additionally I will document some vim related things such as how includings in tex are used (and more).

2 Additional Features

2.1 Navigation in Vim

- Searching for file in subdirectory: `<Ctl>p` and then search
- Browsing files with ranger: `<Ctrl>n`
- Searching with NerdTree: `<Space>n`

2.2 Buffers

- Look at buffers: `:buffers` or `<Ctrl>b`
- Opening buffer vertical: `:vert sb<idx>`
- Opening buffer horizontally: `sb<idx>`
- Delete buffer: `<Space><Enter>`

2.3 Tabs and Tab-Navigation

- Open tab: Use `:tabedit` or `<Space>t`
- Previous tab: `gT` or `<Space>,`
- Next tab: `gt` or `<Space>.`
- Go to a numbered tab: `<idx>gt`
